**PROFIT-TAKING CAUSED** HEAVY SALES OF STOCKS.

RESULTED IN TENDENCY OF

MARKET TO REACT.

London Bought Heavily and First Hour Was Furiously Active-

Money Continued East. New York, Nov. 21 .- To-day's stock mar-

ket represented nothing more than the routine progress of a speculative boom. There was a continuance of a large and well distributed demand for stocks, and there was very heavy selling to take profits. The result was the same irregularity in price movement which has been more or less the rule ever since the present specula-

tive period began. The profit-taking to-day somewhat overbore the new buying, or, at all events, the selling movement showed its greatest force toward the close of the session, so that the sentimental effect in to-day's market was on the side of reaction to a greater extent

on the side of reaction to a greater extent
than on previous days.

A comparative measure of the profittaking on such days as yesterday, and today is difficult to fix, but yesterday's trading
was clearly calculated to influence an adwas clearly calculated to movement came late and overcame the earlier depression. That influence was clear this morning in the large buying orders which had come into commission-houses over night for exe-

London also felt the influence and bought stocks in the American department on a large scale. Assertions are made that the foreign speculative public is showing a growing interest in American stocks, but the largest part of the foreign buying is attributed to the provision making against the options sold by foreign dealers before he election, a large part of which are still come due, with very heavy losses al-lecty shown by the great advance in

come due, with very heavy losses alterly shown by the great advance in prices.

Undoubtedly very large operations are conducted also in London on cabled instructions from New York. It was perfectly natural that the good market afforded by the large buying this morning should be taken advantage of to take profits on the notable advance in prices of yesterday. The first hour of the market was furlously active, and remarkably steady, the demand being fed so freely as to preclude any sensational advances. But, as an impression began to be made on prices, the selling pressure was relaxed, showing the careful nursing process of the powerful speculative leaders, who are at the head of the present movement. Buying was then diverted to new points, and under cover of the notable advance thus achieved, the realizing was resumed.

The day closed with the market somewhat overwhelmed with the volume of realizing, although there were some final railies on short covering. But last prices were near to the lowest, except in the stocks that had been especially strong. The grangers were foremost in this list, St. Paul leading with an extreme advance of 3%, Atchison common was very heavily bought at an advance of 2%. Brooklyn Transit and the other local traction stocks, Louisville, and, at one time, Sugar and People's Gas, were also strong points.

the other local traction stocks, Louisville, and, at one time, Sugar and People's Gas, were also strong points.

The Northern Pecific stocks were naturally prominent in the reactionary tendency, after yesterday's notable advance, and Pennsylvania was also quite weak. The steel stocks yielded to increasing pressure and closed the day generally at net declines. The early strength in Union Pacific, the Denver and Rio Grandes and the St. Jouis and San Francisco stocks yielded to reaction. The international Paper and Bag and Paper stocks were weak on talk of a strong rival organization.

The demonstrative publication of a bull-lish interview by the most prominent individual operator in the street was made the occasion for much of the profit-taking. Money continued easy and the Subtreasury paid but \$1,600,000 on account of assay office checks for gold deposited at Pacific Coast points from Australia. This swelled the total balance of the Subtreasury at the Clearing-house to \$2,041,496. The undertone of the sterling exchange market continued firm in spite of some large buying of stocks for London account.

The bond market showed well-distributed strength on a large volume of dealings.

States bonds were all unchanged from last BOND SALES AT NEW YORK. REPUBLIC SPECIAL New York, Nov. 21.-S here to-day as follows;

LOCAL MONEY MARKET.

Active Business Reported-Money in Fair Demand and Rates Steady.

St. Louis, Wednesday, November 21, 1999. While there are no changes of striking importance to be noted in connection with local monetary affairs, bankers generally report that business in all branches of bunking is altogether attisfactory and fully up to their expectations. Checking and depositing, and particularly the latter, continue active. The money demand shows no abatement, isoanable funds continue in ample supply and interest rates firm and unchanged, call and time loans generally being made at 5 to 7 per cent. The business with country banks was again active.

The local bank clearings this morning were fully up to those posted during previous days of the week, and were \$6,875,498, the balances amounting to \$657,006.

Bonnestic Exchange.

LOCAL STOCKS AND BONDS. Prices Weaker. There was little or nothing to the local stock

and bond market to-day. Orders still continue scarce and brokers appeared to be indifferent about executing them, consequently the general market was slow and without a single feature that could be called interesting. Weakness has spread considerably this week, and pretty near everything on the list has declined more or less. A very sick market was had in United Railways, both stocks and bonds being dull, lower and weak, Orders were few and the day's deal-ings insignificantly small, including three 4s at \$81.55 and 25 shares preferred at \$13.75. At elec-te former was \$84 bid and \$84.56 helicd, and the latter \$83.50 bid and \$84 asked. Transit, or com-mon, was quoted at \$18.50 bid and \$19 asked.

mon, was quoted at \$18.50 bid and \$19 asked.

Local bank and trust stocks were almost entirely neglected, only one or two being mentioned during the course of the day's meeting and then in a half-bearted way. The feeling was not near 30 strong as it has been lately and in several instances weakness was shown. For instance, Commerce was offered at \$259, with no bids. The best hid heard for Mechanics' was \$250, and \$152.50 for Third. Bids were asked for on several others, but none were forthcoming.

Trust stocks were even worse off than bank stocks, they attracting much less attention. The only bid made was \$250 for Union, for which \$234 was asked, and \$1. Louis was queted at \$250 seller. This comprised the local market.

Among the strongest stocks mentioned and traded in this morning were St. Louis and Suburban, 105 shares of which brought \$54, and for which \$44.75 was bid at close, and \$55.50 nske. The bends were strong, but not quotably changed. Missouri 5s and preferred were also quite strong but very scarce. One trade was made in a bond at \$55.75, which was bid, and \$55 asked for more. The preferred was quoted strong and salable at \$51.

It was at "Rauss mit ihm" market for mining stocks, the pressure as existed being on the seling side, and sales were at a decline, American-Nettle selling to the extent of 100 shares at \$1.379 and \$1.35 bld, and 200 Granite-Bi-Metallic at \$2.50.

There was no market for stocks or bonds of a miscellaneous character, and many were not even quoted, while other prices made were nominal.

Although no price was made on Lincoln Trust stock at the regular session this morning, later on the "curb" as high as \$150 was bid.

New York Market Gossip.

The following synopsis of the gossip in regard to the leading features of the New York market was received by D. R. Francis, Bro. & Co.:

The market quiet all day in comparison with recent days. Prices are being held up in some quarters, stocks not pressing heavily for sale.

At present levels, evidently, stocks are not attractive generally to buyers, wherefore the falling off in interest. The reaction undoubtedly needs to go further before the market can be expected to develop a healthier tone, after the inordinately rapid piece with which it mounted up.

A. B. R. T. director and a Metropolitan Street Railway representative deny the rumor of a connection between the two companies, James R. Keene is out in a bullish interview this morning. It is regarded with suspicion in many quarters.

The tecanical position of the market warrants taking profits on bulges, a see-sawing movement with a sagging tendency seeming to be promised. New York Market Gossip.
